GUIDELINE FOR INTERVIEW ON JANUARY 23, 2007

This document is provided as a guideline for the interview that Applicant's attorney and the Examiner have agreed to have on January 23, 2007. In general, applicant would like discuss independent claim 66 and the fact the DeMeyer reference does not teach or suggest a system wherein a wireless device transmits signal strength information to receivers. Instead, DeMeyer only teaches systems wherein a wireless device transmits position information or signals having known strengths as opposed to signal strength information.

In addition, Applicant would like to briefly discuss claim 2 which requires, among other things, a human machine interface device.

Respectfully submitted,

DAVID W. FARCHMIN
